

According to economists, Measures 66 & 67 will cost 70,000 more Oregonians their jobs.

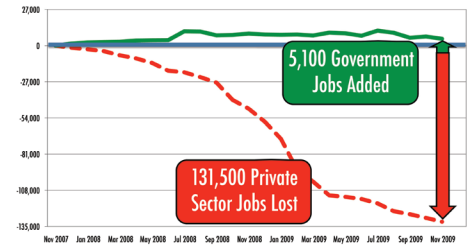

Oregon has lost more than 131,500 private-sector jobs since this recession began, while government jobs have increased. Now lawmakers want to raise business and personal income taxes permanently, putting more jobs at risk. Economists warn that, if these measures pass, 70,000 more Oregonians would lose their jobs.

- Legislators say their plan only taxes the rich. They're wrong. We'll end up paying more for groceries, gas and other services, and that will impact all Oregonians, especially the poor.
- Minimum taxes apply only to corporations with no taxable income. Measure 67 would tax businesses up to \$100,000, even if they didn't make a profit.
- More than 66% of Oregonians impacted by Measure 66 tax increases are small business owners who report business income on personal tax returns.
- The tax increases would be retroactive to January 1, 2009, and no money to cover this tax increase has been withheld from Oregonians' paychecks during all of 2009.
